

# Leonardo da Vinci

the artist with a vision, who liked  
investigating how things work

TODAY I AM... someone who likes investigating how things work.

Inspired by the visionary, **Leonardo da Vinci**, your invention challenge is to:

- \* decide what amazing invention you would like to create
- \* design, draw and label – is there a problem you'd like to design an invention to solve. Use a sketchbook to work through your ideas
- \* and for an extra challenge, find some inspiration in the natural world

## Notes

"I wasn't just fascinated  
by human anatomy. I studied  
birds and bats and flying  
insects, trying to work out how  
they stay up in the air."
