6	INTRODUCTION	28	MEDIA
6	Why we make models	30	Introduction
14	A brief history	30	Abstraction
20	Modelmaking now	32	Size and scale
21	About this book	34	The selection and composition of media
22	Getting started	36	Paper and cardboard
26	Machines	41	Step by step: Developing a design using paper models
		48	Wood
		55	Step by step: Woodworking
		57	Styrofoam, acrylic and plastics
		62	Case study: Using plastics and styrofoam
		66	Step by step: Making an acrylic model
		71	Resin, clay and cast materials
		73	Step by step: Casting a plaster model from a silicone mould
		78	Case study: Casting resin elements
		79	Step by step: Using plasticine to develop form
		80	Step by step: Casting a concrete model
		81	Step by step: Casting concrete components from a silicone mould
		82	Steel and other metalwork
		83	Step by step: Modelling a geodesic dome
		86	CAD/CAM
		88	CNC
		92	Step by step: Powder printing
		93	Step by step: ABS Printing/Rapid prototyping
		94	3D Printing: Amalgam Modelmaking
		95	Step by step: CNC milling & routing

97	Finishing techniques
100	Photography and film
103	Step by step: Creating a realistic photomontage
105	Digital and camera technology
106	Case study: Model photography
107	Case study: Time lapse and lighting effects
108	TYPES
110	Introduction
111	Concept models
113	Case study: From concept to design proposal
114	Site/city models
119	Block/massing models
122	Design development models
126	Step by step: Making a wax model
128	Case study: Process models
129	Spatial models
133	Case study: Spatial models as design generator
134	Structural models
138	Case study: Structural models in the design process
140	Interior architecture models
144	Case study: Exploring light and shadow
146	Lighting models
148	Step by step: Light effects on an interior
152	Presentation/exhibition models
157	Step by step: Making a presentation model
158	Case study: Models for an exhibition
160	Full-sized prototypes
162	Case study: Prototype models
165	Case study: Material exploration through prototypes
166	Step by step: Making a cladding model

168	APPLICATION
170	Introduction
171	Descriptive models
174	Case study: Descriptive model as communication tool
178	Case study: Descriptive model as practice
182	Predictive models
184	Case study: Detail models
186	Case study: Predictive modelling as hybrid process
188	Case Study: Predictive modelling as technical study
189	Evaluative models
193	Case study: Evaluating material properties
194	Step by step: Evaluating the effects of a façade
196	Explorative models
202	Case study: Explorative model of urban flows
203	Case study: Prototyping through explorative models
204	Step by step: Exploring materials through models
205	Case study: Exploring new materials through models
206	Case study: Explorative models of spatial narratives
207	Case study: Taichung Metropolitan Opera House
208	Modelling the future
210	Case study: Integrated making and thinking
212	Glossary
213	Further reading
214	Index
215	Picture credits
216	Acknowledgements
